Electronic equipments used to test power supply of the electromagnetic vibrators.

METER 230V

General

The AMP-VIB products are used to test accurately the electromagnetic vibrators' current at 3000 vib/min or 6000 vib/min.

General Characteristics

Current measurement at 3/8/10/15/20 Amps. • Safety fuse with the short circuit signal • Current measurement based on a specific algorithm.

Applications

Digital measurement of the electromagnetic vibrators' current.

Options

Modbus

Technical Specs

Voltage:	115/230V • 50/60 Hz
Features:	Ampere meter
Applications:	Measure real working current into vibratory feeder
Protection Index:	IP55
